WHERE STYLE

MEETS DURABILITY

STYLISH COLLECTION

Made with aesthetically pleasing colors and finishes, and with the ability to customize your orders, Spectrum produces the market’s #1 choice for modern high-end lockers. Made with phenolic, our lockers are ideal for where areas of high traffic can occur, such as schools, fitness centres, hospitals, arenas, first responder stations, pools, spas, and aquatic centers.

Spectrum phenolic lockers are your absolute best product choice for aesthetics and durability. Our lockers are made from Trespa®, a phenolic material composed of a homogeneous resin core, integrated with a closed cell decorative finish on the outside surface. The GREENGUARD certified, fire rated materials are available in a vast array of solid colors, metallics, and wood grains, which is a dream come true for Designers, Architects, Engineers, and Property Owners.

1

SIDE SINGLE PRONG HOOK
Stainless steel 1" wide single prong hook, mounted with tamper proof fasteners. Brings Spectrum's outer style to the interior.

2

TWO PRONG HOOK
Stainless steel 1" wide two prong hooks are rigid enough to handle the abuse where other materials fail. Continues the overall style of Spectrum's premium stainless steel hardware. Mounted with tamper proof fasteners.

3

HASP LOCK
Designed in house, this stainless steel handle has an elegant appearance and considers the challenges of barrier free design. It is our standard hasp system for the application of a user's own lock.

4

BENCH
Aluminum frames are powder coated black, with phenolic tops, available in the same colors as our lockers. Choose from floor anchored pedestal (shown), H-frame, wall mounted, or integrated bench frame system.

COMPLETE ROOM SYSTEM
Spectrum lockers are packaged with complementary heavy-duty hardware of a high-end finish, satisfying both form and function.

Customized Design

Phenolic is an ideal material and solution for areas of high traffic, and where vandalism and moisture can occur.

Spectrum lockers are constructed of 3/8" (10mm) thick sides, 1/2" (13mm) thick tops, bottoms and shelves. 1/4" (6mm) thick backs and 1/2" (13mm) thick doors. We feature 1, 2, 3, 4, 5, 6, and Z tier locker options.

While we offer these standard configurations, Spectrum always accepts requests for custom orders. Spectrum lockers follow standard sizes and cater to any custom specification that a project may require.
